Prof. Truong-Son Hy

Website: `https://hytruongson.github.io/HySonLab/` Email: thy@uab.edu Office: (+1) 205-934-8604

Research Interest **HySonLab** is my research group. We work on graph neural networks, deep generative models on graphs, equivariant neural networks, multiresolution machine learning in the direction of **AI for Science, Bioinformatics, Drug Discovery, Drug Repurposing, and Medical AI**.

Education

The University of Chicago September 2016 - June 2022
Illinois, USA
PhD. Computer Science
Thesis: Graph representation learning, deep generative models on graphs, group equivariant molecular neural networks and multiresolution machine learning.
Advisor: Prof. Risi Kondor

The University of Chicago September 2016 - December 2018
Illinois, USA
MSc. Computer Science
Thesis: Covariant compositional networks for learning graphs and GraphFlow deep learning framework in C++/CUDA.
Advisor: Prof. Risi Kondor

Eötvös Loránd University September 2013 - July 2016
Budapest, Hungary
BSc. Computer Science
Thesis: Semi-supervised Adaptive Facial Tracking Method.
Advisor: Prof. Lőrincz András
GPA: **4.98/5** (in Hungary scale), **3.984/4** (in US scale)
Award: First-class Graduation Honour
Sponsor: Stipendium Hungaricum Full Scholarship from the Government of Hungary

Current Position

University of Alabama at Birmingham **(Tenure-Track) Assistant Professor**
Department of Computer Science August 2024 – present

- Affiliated faculty with Heersink School of Medicine (UAB), Center for Clinical and Translational Science (CCTS).
- Research and advise PhD students in AI for Science, Bioinformatics, Drug Discovery.
- UAB Scholars: `https://scholars.uab.edu/19454-truongson-hy/`
- Faculty Profile: `https://www.uab.edu/cas/computerscience/people/faculty-directory/faculty/hy-truong-son`
- Fall 2024: Teach CS 660/760 (Master/PhD) – Artificial Intelligence [Syllabus].
- Spring 2025: Teach CS 663/763 (Master/PhD) – Data Mining [Syllabus].

Work Experience

Indiana State University **(Tenure-Track) Assistant Professor**
Department of Mathematics and Computer Science August 2023 – July 2024

- Fall 2023: CS 617 – Data Mining [Syllabus]
- Spring 2024: CS 417 – Machine Learning, CS 475/575 – Artificial Intelligence
- Serve in faculty search committees for Departments of Biology and Computer Science.

Porter Cancer Research Center **Affiliated Faculty**
Terre Haute, Indiana February 2024 – July 2024

- Deep Learning for Drug Discovery & Drug Repurposing.

The Center for Genomic Advocacy **Affiliated Faculty**
Terre Haute, Indiana February 2024 – July 2024

- Genomic Large Language Models.

University of California San Diego — **Postdoctoral Fellow & Lecturer**
Halicioglu Data Science Institute — September 2022 – April 2023

- Mentor: Prof. Yusu Wang.
- I taught DSC 40A - Theoretical Foundations of Data Science (Fall 2022) [Course Materials].

Facebook Inc. — **PhD Intern**
Ads Machine Learning, Seattle office — June – August 2020
Project:

- Task: Implementation of a transfer learning scheme in distributed system for large-scale sparse neural networks to classify and rank two billion users' advertisements. The framework is built based on Caffe2.
- Programming language: Python.
- Result: The models are implemented, trained and tested on 1 week of Facebook data.

Google Inc. — **Site Reliability Engineer Intern**
Networking SRE, Sunnyvale office — June – September 2018, 2019
Project:

- Task: Utilize machine learning and statistical techniques including message passing neural networks to design a methodology for root cause analysis and auto detection of network failures based on network events and topology. The Google's technologies used for this project include Unified Network Model, Borgmon and TensorFlow.
- Programming language: C++ and Python.
- Result: Implementation of several Machine Learning methods on real production data of network topologies and monitoring systems.

Google Inc. — **Software Engineer Intern**
Security and Privacy, Chicago office — June 2017 – September 2017
Project:

- Task: Analyze series of Googlers' accesses of sensitive data to detect anomalous behaviors from internal actors. Replace the daily analysis by a real-time analysis to reduce the latency of the current continuous pipeline. Apply Machine Learning and statistical models to evaluate and cluster data access logs in Google distributed systems. The challenge is to integrate with the existing Google's infrastructure, learn and use multiple Google's technologies such as Bigtable and Flume.
- Programming language: Java.
- Result: Successfully tested with artificially generated data that simulates the working pipeline in one year.

Neural Information Processing Group — **Undergraduate Research Student**
Eötvös Loránd University — April 2014 – July 2016

- Website: `http://nipg04.inf.elte.hu/`
- Working under the supervision of Prof. Lőrincz András with main focus on facial analysis and sparse coding learning algorithms.

PhD Students

At University of Alabama at Birmingham, I am grateful to advise talented and hard-working PhD students:

- Viet Thanh Duy Nguyen (from Spring 2025)

PhD Committee

It is my honor to serve in the PhD committee of:

- Tien Kha Pham, Deakin University, Australia in 2024. His PhD thesis' title is "Memory for Fast Adaptation in Neural Networks".
- Shishir Sarker, Department of Biology, Indiana State University, United States from 2024. His PhD thesis' theme is "Study of regulating the virulence effect by inhibiting SIP binding to RopB".

At University of Alabama at Birmingham, I serve in the PhD committee for junior PhD students:

- Sharif Noor Zisad (from 2024)
- Delower Hossain (from 2024)
- Mengchen Fan (from 2024)
- Sheikh Abujar (from 2024)

Organizer & Area Chair

I co-organize and serve as a senior meta-reviewer, i.e. area chair, for the following conferences:

- BIOKDD 2025 – 24th International Workshop on Data Mining in Bioinformatics, collocated with ACM SIGKDD 2025 [website] [proceedings]

Software
[HySonLab]
[HyTruongSon]

38. FactAgent: A sophisticated multi-agent fact-checking system that combines advanced evidence retrieval techniques to verify factual claims across diverse domains.
`https://github.com/HySonLab/FactAgent`

37. MatCPP: Efficient Matheuristics for Solving the Chinese Postman Problem with Load Constraints.
`https://github.com/HySonLab/MatCPP`

36. PointDistill: Topology-Guided Knowledge Distillation for Efficient Point Cloud Processing.
`https://github.com/HySonLab/PointDistill`

35. EquiHGNN: Rotationally Equivariant HyperGraph Neural Networks.
`https://github.com/HySonLab/EquiHGNN/`

34. Design2Code: Multimodal graph representation learning for website source code generation given visual sketch.
`https://github.com/HySonLab/Design2Code`

33. WaveletPE: Range-aware Graph Positional Encoding via High-order Pretraining.
`https://github.com/HySonLab/WaveletPE`

32. LANTERN: Leveraging Large Language Models and Transformers for Enhanced Molecular Interactions.
https://github.com/HySonLab/LANTERN

31. MOB-GCN: Multiscale Object-Based Graph Neural Network for Hyperspectral Image Segmentation and Classification.
https://github.com/HySonLab/MultiscaleHSI

30. BioMedKG: Multimodal Contrastive Representation Learning in Augmented Biomedical Knowledge Graphs.
https://github.com/HySonLab/BioMedKG

29. ArcRoute: Hybrid algorithm combining Reinforcement Learning (RL) and heuristics to solve Hierarchical Directed Capacitated Arc Routing Problem (HDCARP).
https://github.com/HySonLab/ArcRoute

28. DrugPipe: Generative AI-assisted Drug Repurposing Pipeline.
https://github.com/HySonLab/DrugPipe

27. TESGNN: 3D Temporal Equivariant Scene Graph Neural Networks.
https://github.com/HySonLab/TESGraph

26. LightMed: A Light-weight and Robust FFT-Based Model for Adversarially Resilient Medical Image Segmentation.
https://github.com/HySonLab/LightMed

25. EntityKG: A Framework for Supervised Learning Knowledge Graph from Speech.
https://github.com/HySonLab/EntityKG

24. VietMedKG: Knowledge Graph and Benchmark for Traditional Vietnamese Medicine.
https://github.com/HySonLab/VietMedKG

23. ML4Insects: A library for EPG signal analysis of pierce-sucking insects.
https://github.com/HySonLab/ML4Insects/

22. Hierarchical Attention: Scalable Hierarchical Self-Attention with Learnable Hierarchy for Long-Range Interactions (TMLR).
https://github.com/HySonLab/HierAttention

21. EquiMesh: E(3)-Equivariant Mesh Neural Networks (AISTATS 2024).
https://github.com/HySonLab/EquiMesh

20. Protein-Redesign: Complex-based Ligand-Binding Proteins Redesign by Equivariant Diffusion-based Generative Models.
https://github.com/HySonLab/Protein_Redesign

19. LatentDE: Latent-based Directed Evolution for Protein Design.
https://github.com/HySonLab/LatentDE

18. Protein-Pretrain: Multimodal Pretraining for Unsupervised Protein Representation Learning.
https://github.com/HySonLab/Protein_Pretrain

17. Protein-Design: Protein Design by Machine Learning guided Directed Evolution.
https://github.com/HySonLab/Directed_Evolution

16. Multires-NP-hard: Symmetry-preserving and multiresolution Reinforcement Learning to solve NP-hard problems in Operations Research including TSP and VRP.
https://github.com/HySonLab/Multires-NP-hard

15. CPP-LC: Implementation in C++ for the Chinese postman problem with load constraints (CPP-LC) with Evolutionary Algorithm, Ant Colony Optimization and many other meta-heuristics.
https://github.com/HySonLab/Chinese_Postman_Problem

14. Ligand generation: Target-aware Variational Auto-encoders for Ligand Generation with Multimodal Protein Representation Learning.
https://github.com/HySonLab/Ligand_Generation

13. GraphLASSO: Sparsity exploitation via discovering graphical models in multi-variate time-series forecasting.
https://github.com/HySonLab/GraphLASSO

12. Machine Learning for Epidemiology: Predicting COVID-19 pandemic by spatio-temporal graph neural networks.
https://github.com/HySonLab/pandemic_tgnn

11. Multiresolution Graph Transformers: Learning hierarchical structures including proteins and polymers by multiresolution graph transformers and wavelet positional encoding.
https://github.com/HySonLab/Multires-Graph-Transformer

10. TWGNN: Fast Temporal Wavelet Graph Neural Networks for learning timeseries with underlying graph structure with applications in traffic prediction and brain networks.
https://github.com/HySonLab/TWGNN

9. ViDeBERTa: A powerful pre-trained language model for Vietnamese (EACL 2023).
https://github.com/HySonLab/ViDeBERTa

8. Drugs-Proteins knowledge graph: Large-scale deep generative models on multi-modal knowledge graph for predicting drug interactions.
https://github.com/HySonLab/drug-interactions

7. Spherical CNNs: PyTorch implementation of Spherical Convolutional Neural Networks with Clebsch–Gordan transform for nonlinearity in the Fourier space.
https://github.com/risilab/SphericalNet

6. Learnable MMF: Learning Multiresolution Matrix Factorization and its Wavelet Networks on Graphs.
https://github.com/risilab/Learnable_MMF

5. MGVAE: Multiresolution Equivariant Graph Variational Autoencoder (MGVAE) and Multiresolution Graph Networks (MGN) for supervised molecular properties prediction, unsupervised molecular representation learning, graph generation, citation link prediction and graph-based image generation.
https://github.com/HyTruongSon/MGVAE

4. LibCCNs: Covariant Compositional Networks Library is an easy-to-use and efficient implementation of Covariant Compositional Networks (CCNs) with TensorFlow and PyTorch's APIs based on a shared common C++ core.
https://github.com/HyTruongSon/LibCCNs

3. Invariant Graph Networks: A PyTorch implementation of the Invariant and Equivariant Graph Networks.
https://github.com/HyTruongSon/InvariantGraphNetworks-PyTorch

2. GraphFlow: Deep Learning framework built from scratch in C++/CUDA that supports symbolic/automatic differentiation, dynamic computation graphs, tensor/matrix operations accelerated by GPU and implementations of various state-of-the-art graph neural networks and other Machine Learning models.
https://github.com/HyTruongSon/GraphFlow

1. Fourier Transform Library: 1D/2D FFT, DFT and DCT; JPEG image compression.
https://github.com/HyTruongSon/Fourier-Transform-Library

Awards

Data Science Postdoctoral Fellowship September 2022 – July 2024
Awarded by the Halicioglu Data Science Institute at University of California San Diego.

Postdoctoral Fellowship (Declined) September 2022 – July 2024
Awarded by the Vector Institute (Canada).

University Unrestricted (UU) PhD Fellowship Spring quarter 2022
Awarded by the graduate committee at University of Chicago.

University Unrestricted (UU) PhD Fellowship Autumn quarter 2017
Awarded by the graduate committee at University of Chicago.

First-class Graduation Honor Class of 2016
Awarded by the highest GPA achiever by Faculty of Informatics at Eötvös Loránd University.

The title of Excellent Student of the Faculty Academic year 2014 - 2015
Awarded to 2 out of 4,000 BSc. students (0.05%) of the Faculty of Informatics with outstanding academic performance and scientific activity at Eötvös Loránd University.

Stipendium Hungaricum Full Scholarship September 2013 – July 2016
Awarded by the Government of Hungary that covers tuition fee and living expenses.

First position at National Conference of Students' Scientific Association April 2015
Thesis: *Semi-supervised Adaptive Facial Tracking Method.*

Morgan Stanley Scholarship 2015
Amount: 75,000 HUF.

1st place at Hungarian ACM Programming Contest October 2015
Team ELTE-Sparrows solved 9/10 problems, ranked 1 out of 35 teams nationwide.

The 2015 ACM ICPC Central Europe Regional Contest November 2015
Team ELTE-1 achieved Honorable Mention in Zagreb, Croatia.

2nd place at Hungarian ACM Programming Contest October 2014
Team ELTE-UFMG-UFPB solved 5/10 problems, ranked 2 out of 33 teams nationwide.

The 2014 ACM ICPC Central Europe Regional Contest November 2014
Team ELTE-2 achieved Honorable Mention in Krakow, Poland.

7th place at ACM ICPC Asia Regional Programming Contest November 2012
Team DiscreteMath achieved Consolidation prize, ranked 7 out of 59 teams from Asia.

Special prize at the NAPROCK 4th International Programming Contest 2012
Location: Omuta, Japan.

Silver Cup at the Vietnam Olympic of University Students in Informatics 2012
Location: Hanoi, Vietnam.

Runner-up prize at the National Excellent Student Contest in Informatics 2011
Location: Hanoi, Vietnam.

Media

- The newspaper of Vietnam Ministry of Science & Technology wrote an article about my lab's research in AI for Protein Design: [link]
- UAB wrote an article about my lab's research in AI for Drug Discovery: [link]
- Article about myself at Thanh Nien Newspaper, one of the major newspapers in Vietnam: [Vietnamese] [English]
- Article about my advices for younger generation at Thanh Nien Newspaper: [Vietnamese]

Invited Talks

16. Adobe Research August 21, 2025
Talk: *Geometric Deep Learning: From 3D Point Clouds and Meshes to Scene Understanding and Distillation.*
Host: Dr. Viet Lai.

15. Universitas Gadjah Mada, Indonesia [certificate] July 29, 2025
Talk: *Generative AI & Geometric Deep Learning for Protein Science and Drug Discovery.*
Host: Prof. Muhammad Husni Santriaji.

14. Robotics & AI Expert Talk July 18, 2025
Talk: *Generative AI & Geometric Deep Learning for Protein Science and Drug Discovery.*
Host: Dr. Tan-Hanh Pham, Harvard Medical School.

13. UAB Department of Mechanical and Materials Engineering January 24, 2025
Talk: *Geometric Deep Learning for Protein Science and Drug Discovery.*
Host: Prof. Mark Banaszak Holl.

12. University of Alabama at Birmingham May 15, 2024
Talk: *Geometric Deep Learning for Protein Science and Drug Discovery.*
Host: Prof. Ragib Hasan.

11. University of Massachusetts Boston April 11, 2024
Talk: *Geometric Deep Learning for Protein Science and Drug Discovery.*
Host: Prof. Albert Kao.

10. VinUniversity December 28, 2023
Talk: *Graph representation learning and Deep generative models on graphs.*
Host: Prof. Le Duy Dung (Andrew).

9. Indiana State University February 1, 2023
Talk: *Graph representation learning and Deep generative models on graphs.*
Host: Prof. Arash Rafiey.

8. Virginia Commonwealth University September 30, 2022
Talk: *Graph representation learning and Deep generative models on graphs.*
Host: Prof. Thang Dinh.

7. Le Quy Don Technical University (Military Technical Academy) September 8, 2022
Talk: *Graph representation learning and Deep generative models on graphs.*
Host: Faculty of Information Technology.

6. FPT Software June 2, 2022
Talk: *Graph representation learning and Deep generative models on graphs.*
Host: FPT AI Center.

5. Vector Institute for Artificial Intelligence April 6, 2022
Talk: *Graph representation learning and Deep generative models on graphs.*
Host: Prof. Pascal Poupart.

4. University of California San Diego February 24, 2022
Talk: *Graph representation learning and Multiresolution machine learning.*
Host: Prof. Rose Yu, Prof. Yusu Wang.

3. California Institute of Technology February 3, 2022
Talk: *Graph representation learning, deep generative models on graphs and multiresolution machine learning.*
Host: Prof. Anima Anandkumar.

2. University of Illinois Chicago January 26, 2022
Talk: *Graph representation learning and Deep generative models on graphs.*
Host: Department of Mathematics, Statistics, and Computer Science.

1. Argonne National Laboratory January 5, 2022
Talk: *Graph representation learning, deep generative models on graphs and multiresolution machine learning.*
Host: Dr. Stefan Wild, Dr. Emil Constantinescu.
