Hints

Please don’t touch the camera lens -- it’s very fragile. If it’s very blurry, try unplugging and reconnecting the power cable.
Hints

Please don’t touch the camera lens -- it’s very fragile. If it’s very blurry, try unplugging and reconnecting the power cable.

Watch out for the capacitive buttons on the edge of the mic. They’ll mute it. (ring will turn red) - Just tap again to unmute!

Watch out for the capacitive buttons on the edge of the mic. They’ll mute it. (ring will turn red) - Just tap again to unmute!

Trouble with WiFi for the presenter laptop? It drives me crazy too. If you have an Ethernet port+cable, plug your laptop into this switch on the tabletop a wired link!
When you’re done...

- Please log out/reboot the Mac... you don’t want anyone else using your account!

- Please turn off the projector.
Trouble?

- We’re in Crerar 357 (or sometimes Crerar 259).
- E-mail av@cs.uchicago.edu
- We’re always monitoring #help-desk on the CS Discord. (Try there after-hours, as there’s a lot we can do to help remotely!)
Questions? Suggestions? Complaints?
